

A Test Marking?

(February 26, 2024)

Listen to this article

I recently read several articles from actual medical doctors and researchers that deal with the issue of several unique results of the COVID jabs. For instance, The Reese Report from Greg Reese notes "*Evidence Shows Biological ID System Has Already Been Deployed.*"[1]

Several days prior to that post, one from Ana Maria Mihalcea, MD, PhD was posted on her sub stack titled, "*Fluorescent Orange Face Tattoo Under UV Light In C19 Vaccinated And*

Eye Of Horus Phenomenon - Are Humans Limbic Systems Being Altered For Behavior Modification? "[2]

Both articles utilized the image shown with the caption: *Image Courtesy: Justin Coy, PhD, Individual with 1 Moderna C19 Injection and 3 PCR tests shows orange fluorescent skin tattoo. In the white sclera are 2 fluorescent bright spots on both sides of the iris consistent with Eye of Horus Phenomenon.*

Notice the small white dots in the eyes and near the nose on each side in the photo. This is referred to as the *Eye of Horus*.

New research shows that those who received the COVID shots emit a fluorescent orange glow in their faces that is visible under a UV light of 365 nano-meters. And those who have been exposed to shedding emit this glow around their nose. (The Reese Report)

That should be concerning to all, but most will not be alarmed. Some will be - those who have to date refused the jab - but those who continue to see the jab as efficacious will ignore it because it sounds too much like one of those run of the mill "conspiracy theories."

Apparently, this phenomena goes back to at least 2008 when "*a biological nanotechnology pesticide designed to kill the Brown Moth in the state of California was deployed and appears to have included the same sort of fluorescent invisible micro dye that we see in the scientific research.*"

Another researcher - Justin Coy notes the following.

...the genetic code for Luciferase, a bio-luminescent enzyme found in nature, is included in the Pfizer and Moderna vaccines along with SV40, which could theoretically allow the Luciferase to be written into the genetics of the recipient. Coy proposes that this could be what is causing the vaxxed to glow under UV light.

SV40 is a known cancer-causing agent (which is why it was removed from the Polio vaccine decades ago). Why was it included in the COVID jab?

But did you also notice the phrase, "*which could theoretically allow the Luciferase to be written into the genetics of the recipient*"? There has been a great deal of discussion regarding how the COVID jab acts on the human genome. In essence, many medical authorities believe the jab to be gene therapy, installing itself into cells to process the "message" initiated by the jab itself. More information can be obtained about this at Daily Clout.[3]

Obviously, if the jab is responsible for this issue, then the ramifications are alarming. Why would they "mark" people like this? What's in it for them? Well I suppose it's one way to determine who has had their jabs, isn't it (if having to pass through a UV light source at some point).

It's also reminiscent of the future when the "mark of the beast" is put into effect and made mandatory (**Revelation 13:11-17**). Is what's happening now merely a trial run, a test marking? Could this be a type of "brand" like farmers who brand their cattle?

But aside from the issue of fluorescence in those who have taken the jab, are there any other issues related to the jab itself? There are actually many, yet for the most part, the medical complex appears unwilling to consider these problems as it continues to move ahead with their preparations of more jabs for future "pandemics" like "Disease X."

For one thing, more and more embalmers/coroners are seeing a huge increase in white fibrous clotting they're having to remove from dead people before they can embalm.[4][5] There's a connection in the way the spike protein works within the body to actually *increase* the incidence of fibrin clotting.

Normally, the body continually forms and then breaks down fibrin clots, but once they become misfolded, the enzymes the body uses to break the clots down no longer "fit," and hence can't break them down. Since the spike protein causes proteins to misfold (either due to its prion domain or its effect on the physiologic zeta potential), researchers had discovered that the presence of the spike protein caused misfolded fibrin clots to form that gradually collected on the walls of containers designed to simulate living blood vessels...it would result in larger and larger clots forming which would eventually match the shape of the blood vessels they encased them. That model has since become the accepted explanation for those amyloid clots.

So is the spike protein actually creating an environment where these fibrin clots are not only created but encourages their growth? Why isn't the medical complex warning about this? Except for a few doctors here and there, we are hearing nothing about it. But it doesn't stop with fibrous clots either.

Dr. Michael Nehls has recently noted that the "*mRNA Injections Erase Autobiographical Memory in Hippocampus*." [6] That should also set off red flags. Instead, most of those within the medical complex refuse to acknowledge this problem, just like they continue to ignore all of the serious adverse reactions, including turbo cancers and even deaths from the jab. They simply deny and even cast aspersions on those who attempt to have the discussion regarding the possibility of the jab causing these and other issues.

According to Dr. Michael Nehls, the spike protein from the virus and the mRNA injections attack the brain. They erase one's autobiographical memory in the hippocampus. People lose their curiosity and brain processing. The nerve cells lead to Alzheimer's conditions. Many go through a personality change.

The spike protein has become a brain toxin. A vulnerability has been created in the brain, that can be filled with any fear based message.

Is this why some folks go through a major change in their personalities? According to Nehls, it's not only possible, but likely. The hippocampus retains our memories and creates the way we think and our personality itself. To destroy the hippocampus is to destroy the person and personality because memories are housed there. So what the jab can do is to create a large portion of society that suffers from Alzheimer's and other mental issues. Is it a stretch to think that with on the rise state-sponsored euthanasia, those particular folks will be put into literal killing facilities rather than continuing to be a drain on society?

But in spite of the level of adverse reactions and deaths, including its effects on the hippocampus, the main pushers of the jab continue to push it, even for babies only months old. I recall several years ago after the COvid jab was introduced and certain doctors like McCullough, Tenpenny, Kory and a host of others warned us of upcoming potentially major problems that would cause toxicity in people. This would be seen in many types of reactions including deaths. The idea was that it would build to a point where the number of deaths would seem horrific yet ignored by the medical complex.

Just the other day, our niece told us that a ten year-old friend of her daughter's died suddenly. There is no explanation at this point and of course, parents and friends are grieving and baffled. Our niece has had the jab as has her husband, but we don't believe the kids have. Yet, it is clear that many parents have taken their children to receive the COvid jab and what we are seeing could very well be the tragic result of that.

Remember when healthcare workers had time to create intricate dance videos about how allegedly overworked they were? This was before the jab was available and none of them were mandated to take it. Since then, most healthcare workers were mandated to take the jab and did so, and now we are seeing the results of it, as reported by William Makis MD.

NURSES collapsing with Cardiac arrests, blood clots, aneurysms, dying in sleep, Turbo Cancers and Sudden Deaths - 100 Nurses Injured & dead (since May 2023)[7]

We won't even discuss the number of young doctors in Canada who have "died suddenly" after the jab rollout. Makis goes onto say, "*Nurses and Teachers are the two professions that are getting completely annihilated by COVID-19 mRNA Vaccine mandates and the lethal effects those mandates continue to have to this day.*"

In another issue, apparently there is also a huge difference between vaccinated and unvaccinated blood. [8] People may want to keep this in mind when having to undergo surgeries that may require blood transfusions.

Let's not forget that the globalists seek one major thing: *control*. They want total control over what we eat, where we can go, what type of money we use, how we can spend it, and essentially everything we do. They intend to create a one-world global government that has tyrannical control over the entire global society. This is a hugely tall order that they have embarked on and because of that, many throughout global society won't even consider the reality of it. It's too "far-fetched" they think. Either it'll never happen or they will simply embrace it, like folks are doing in Tempe, AZ with the creation of America's first "smart city" called "Culdesac," [9] as I've discussed in a previous article.

A Tempe, Arizona, neighborhood has been named "Culdesac" and is America's first example of a 15-minute city, a vision of the World Economic Forum and the globalist cult, who are pitching the concept as being more environmentally friendly. Instead of seeing this development as a dystopian nightmare, Culdesac residents appear to be thrilled at their new way of life...

People gravitate toward things that make life easier, safer and more secure. Not long ago, my wife and I watched a short video of a woman in a store at checkout. Apparently, she'd had a chip inserted in her hand, so to make the purchase she simply placed her palm over the reader and the sale went through. She was nearly breathless with excitement. I'm amazed at how many people are literally welcoming their own restrictions and imprisonment. They seem clueless about it.

Part of this attempt to control is seen in some of the other things they're doing. Bill Gates is making his dystopian dream of blocking at least some of the sun's rays a reality. [10] I can't help but wonder whether God will use some of these man-made problems during the coming Tribulation to bring about some of His judgments listed in **Revelation 6-18.**"

They aren't even sure what problems may be associated with blocking even part of the sun's rays, yet good ol' Big Tech eugenicist Bill Gates thinks his "solution" will solve climate change. I honestly do not believe he believes in it, but he may be that vapid. If he doesn't, then what is this all about? It's about killing the earth and heavily reducing the amount of food that's available for people, which in turn, will create famines and pestilences around the globe, not to mention a severe increase in violence. Massive death is the result.

One thing these globalists have in common is their dedication to destroying life. They've proved it repeatedly. They mirror Satan's desire to destroy God's Creation because globalists are empowered by Satan.

Keep looking up, folks. It's probably best to learn to be "invisible" as much as possible. Live quiet lives but always be prepared to give someone the reason for the hope that you possess in Christ (**1 Peter 3:15**).
